(Enclosure)

Mr. Peter Pagnette,  
Supt. Navajo School.

My dear Mr. Pagnette:

The census roll of the Navajo Indians as submitted on Dec. 26, 1915, shows 11,915 Indians, which is <sup>considerably</sup> ~~greatly~~ in excess of the population as heretofore estimated & reported.

~~In looking thru~~ The census roll, pages 68 to 119, show 157 Black Mountain Indians, and pages 157 to 205, (Roll nos. 8,923 to 11,915) show 2,992 Indians, in St. Michaels, Railroad, Guni district, ~~which raise a question~~.

Do not the Black Mountain Indians above mentioned, belong under the jurisdiction of the Superintendents of Western Navajo and Mogavi?

Are not these Indians numbering 2,992 in the Guni district south of the Santa Fe Railroad, on public domain?

Deducting the Black Mountain  
Indians (1577), and those on public domain,  
(2,992) from the 11,915 as shown <sup>on</sup> ~~by~~ the  
Census roll, would leave about  
8,800 Indians under the Navajo  
jurisdiction ~~proper~~, (as shown  
by the maps, which is enclosed)  
~~for your information.~~

Please explain fully for the  
information of the Office.  
I also designate <sup>the</sup> pgs in the Cen Roll  
containing the enumeration of those not  
on pub. L., under your immediate  
jurisdiction

Navajo Ind. Agency

Fort Defiance, Ariz.

Nov. 19, 1919.

The Commissioner of Ind. Affairs.

Wash. D.C.

Sir: answering Office letter dated Nov. 6th citation above, requesting that the census preceding 6/30/19 be transmitted to your Office by July 1, 1919, I wish to state that the census of this reservation was taken in 1915 & since then there has been no census taken of the Navajos under this jurisdiction.

In order to comply with sec 9 of the Act of July 4, 1884, (23 Stat. L., 98) I wish to state that it will take at least 3 or 4,000 to take care of the census on this reservation & it will also require several months work as these people are widely scattered over a great area of country.

I am now preparing a copy of the census which was taken in 1915; of course the Office will realize there has been a great number of births & deaths in 3 yrs time which we have not registered in this Agency.

If the Office desires a new census of the Indians on this reservation, kindly advise me & have funds placed to my credit for this work.

I regret very much that Office letter of July 17, & Aug 6, & telegram dated Aug 21, was overlooked & I assure that this will not happen again.

very resps.

Statement relative to this census:

On June 19, 1914, the Indian Office by letter "Land-Contracts 64386-14 W D W", wrote Supt. Paquette relative to the taking of a census of the Navajo Indians on the Navajo Indian reservation. On June 25, 1915, the Superintendent replied to above cited Office letter and advised that it would be impossible to take a census without special men to take same. The Office by letter "Land-Contracts 74800-14 W D W August 3, 1914, replied to the Superintendent's letter and requested an itemized estimate of what it would cost of take a census. On October 29th, 1914, the Superintendent replied to above cited Office letter and estimated that it would cost as follows to take a census:

3 men, 4 months, with 100 working days,  
at not less than \$6.00 per day, a total of - \$1,800  
These men would furnish own rigs.

For purchase of supplies and equipment and for  
necessary blanks, filing equipment for data,  
etc. - - - - - 200

On December 15, 1914, the Office replied to this estimate (See Office letter Ed-Emps. 120262-14 B S G). On December 22nd, 1914, the Superintendent replied to this letter. The Office had printed 3,500 forms for the census takers per form attached.

The Office by letter "Education-Employees 120262-December 15, 1914, approved the sum of \$1,350 for taking a census and work was begun in April, 1915. However, said sum was wholly insufficient to do the work and a request for authority to settle an indebtedness amounting to \$330 was submitted July 15, 1915 and approved September 10, 1915 (80708-15) making a total cost of \$1,670 for labor. In addition 3,500 census forms were furnished by the Department, cost unknown, 3,000 blanks on which the census was written up were secured at a cost of \$12.00 and filing equipment later purchased and used for census filing cost \$87.50, so that the cost (known) of this census was \$1,769.50 as compared with an estimated cost of \$2,000, difference entirely due to the fact that enumerators were paid \$5.00 per day instead of \$6.00 per day.

Four enumerators were employed, as follows:

James Damon - - - - - For the Agency District,  
Tom Catron - - - - - For the Ganado, etc. District.

In the Agency district there are over three hundred such watering places. Also, same district, there are the following running streams:

Black Creek, a creek out of Buell's Park; Whiskey Creek; a creek near Chee Dodge's place, a stream at Crystal and a number of other small creeks coming out of the ~~mount~~ mountain. Red Lake \* called in Navajo, Beagal Chee, is in the Agency district. Bonito Creek, from which Fort Defiance takes its water supply. Chin Lee district has no running streams except at certain portions of the year the main one being out of the Canyon De Chelley, which runs about 9 months in the year.

The Chin Lee district also has three lakes, the largest of which is on the Chin Lee-Canado road and is quite large and seldom, if ever, goes dry. There are numerous lakes (small) on the Luki Chuki and Choski mountains. The St. Michaels, Railroad and Zuni district has less water than any of the other district.

Explanation as to houses and hogans:

This census shows 766 houses and 2075 hogans. The number of hogans is far in excess of 2075 but that number is what are occupied continuously. Each family has two or three hogans each, a summer and winter home and frequently one family with have two, three or even four hogans in one place - not all occupied. As to houses: Nearly all of these houses are one room houses, without windows and with one door, dirt floor and board or dirt roof. The following parties have good houses:

Chee Dodge has a good, stone house which cost about \$5,000. There is a good stone house at the Cornfields. About twenty other families have two room houses which are fairly good. Mr. A. C. Damon, a white man, married into the tribe has a good house. Also Mr. Albert Arnold, a white man (intermarried) has a good home.

Population:

There are 1042 males and 1106 females four years old and under, making a total of 2248 persons. Covering the ages 5, 6, 7, 8, males and females, there are a total of 1687 persons. Figuring the rate of birth at eight years ago the same as this year the figures above would prove that 561 males and females of the ages 5, 6, 7 and 8 died in four years or a little more than 140 children per year between the ages of 5 and 8 inclusive. Five hundred sixty two children (males and females) have been born on an average for four years (past) 140 (plus) of whom die by the time they reach the age of eight years or nearly 25%. The average length of life of a Navajo, as demonstrated by this roll is 20.1 years, this low average being due to the heavy death rate of infants. The yearly birth rate as to population is 4.7% plus there having been 561 children on an average born during the last four years.

### History as to population:

When the Navajos came back to Fort Defiance, Ariz., from Fort Sumner, New Mexico, in 1868, where they had been held as prisoners of war for three years, the military authorities took a census - that is, they established a stockade at Fort Defiance and counted the ~~number~~ number of persons. The military reports show that there were 7019 Navajos at that time. Old Navajos are agreed that the military authorities were not able to capture all the Navajos when they were removed from here in 1865 and their estimates as to the number who escaped the soldiers varies from a hundred to ten or twelve hundred. Certain it is that the total number of Navajos at that time could not have exceeded 8,500 persons and forty-seven (47) years later the population of this reservation is 11,915 persons. Besides there are the San Juan, Pueblo Bonito, Leupp, Western Navajo reservations besides the Navajos on the Moqui reservation.

### Area and population:

There are 90 townships of land in the Arizona portion of the Navajo reservation, lying in Apache and Navajo counties with an area of 2,523,600 acres; twenty two townships in McKinlay County, New Mexico, with an area of 506,880 acres, or a combined area of ~~2,523,600~~ 3,030,480 acres. Compared with the population this gives each person an acreage of 216.5 acres. However, all of the above cited area does not belong to the reservation, the Santa Fe railway having a grant of land for 40 miles each side of the track and which reaches into the reservation for distances ranging to 35 miles and every alternate section belonging to the Santa Fe. There has recently (12-20-1915) been an exchange of a small acreage.

### Wealth:

On an average the Navajos of this reservation own 34.1 sheep each; 9.7 (plus) goats each; 1.2 (plus) head of cattle; 2.2 (plus) horses each and a small amount of other stock. During the year 1915 the Navajos of this reservation sold stock and other products such as wool, hides, pelts, hay, corn, pinions, etc., to the value of \$990,000.

### School population:

This census shows 4758 school children or rather persons (male and female) between the ages of 5 and 18 (inclusive) of whom 347 are ineligible for school for the following reasons:

Cripples, deformed, etc. - - - -	63	
By reason of being married - - -	284	
		347
Eligible for school - - - - -		4411
total number - - - - -		4758

School facilities:

At this time (12-20-1915) there are the following school facilities for Navajo children of this reservation, or said school facilities are being provided:

	Number capacity
Navajo School - - - - -	430
Chin Lee School - - - - -	200
Tohatchi School - - - - -	150
Luki Chuki School (Day) - -	60
Cornfields Day School - -	30
Total capacity - - - - -	<u>870</u>

of which 780 is Boarding School capacity and 90 day school.

In addition there are the following Mission boarding schools available:

St. Michaels (Catholic) - -	160
Rehoboth (Christian Ref) - -	60
Canada Mission (Presbyterian) -	40
Total mission - - - - -	<u>260</u>

Government - - - - -	870
Mission - - - - -	260
Total - - - - -	<u>1130</u>

Making a total of 1130 children provided for on the reservation. Allowing 150 for nonreservation boarding Schools and with no public schools available there are THREE THOUSAND ONE HUNDRED THIRTY ONE (3131) children of school age totally unprovided with school facilities on this reservation.

Health:

Outside of figures showing 63 children unfit for school owing to various reasons no statistics are presented on this subject for the reason that the census enumerators were not physicians and did not possess the technical knowledge sufficient to ascertain whether members of the families they enumerated were effected with tuberculosis or trachoma, etc. Figures on such subjects can be presented only after a personal examination by a Physician of each individual case.

Industrial - reservation:

This census shows 7393 acres cultivated and 63,866 acres fenced. It is a most difficult matter to secure such data but above figures are very approximately correct. With water undeveloped and no irrigation projects except the Canada project the acreage of which same will cover not being included in above figures for the reason that it is not yet finished or the land put under cultivation, the cultivated acreage is very nearly as much as conditions will permit.

General:

Attention is called to a portion of this census wherein the spelling of names, clans, etc., is given. This data on the Navajo language ~~was~~ is original classification work done by John G. Walker, a Navajo of half blood, formerly a clerk at the Navajo Agency but now (12-20-1915) a trader on the Leupp reservation. All census work is based on this outline as to general spelling and as to clans.

Work of compiling the data, form in which submitted and subjects covered ~~and subject~~ supervised by B. H. Dooley, Clerk, Navajo Agency. All work of compilation done by the regular Navajo Agency Office force.

Every Navajo belongs to some clan of which there are sixty (60). The husband belongs to one clan and the wife and children to another (never the same clan for husband and wife). The wife in nearly every instances is really the head of the family the women very largely controlling property. A family feature of Navajo life in the past was for a man say 25 to marry a woman 35 or forty who had a daughter or daughters growing up. When these girls reached a marriageable age the step-father then married the girl or girls (his step-daughters). The older men also often marry the younger girls. Plural marriages do not exist to any extent, that is, to what has commonly been believed in the past. One hundred eighty three men have two wives, seven three wives and one has four. No additional such marriages are allowed. A Navajo family for the purpose of this census has been defined as follows:

A man, wife and children.  
A widow with children, if any.  
A widower with children, if any.  
A single person, either male or female, 18 years old and over.  
All persons 18 years old and over whether the husband and wife were living together or not.

Dances:

The dance best known is the Yea-be-chai, given during the fall and which often costs the giver four or five hundred dollars and is a nine days' ceremony. The "squaw dance"; the netah or "sing" are also well known. The "Fire Dance" is rarely given as it costs the giver even in excess of the Yea-be-chai and is also a nine day affair. All dances are discouraged but until there is something to take their place they will continue.

Irrigation:

Only one irrigation project has yet been laid out on the Navajo reservation, that at Ganado, Ariz., which will irrigate seven or eight thousand acres. An acreage amounting to about fifty acres is irrigated out of Bontio Creek at Fort Defiance, Ariz. The Navajos irrigate a very small acreage out of Black Creek. They also flood during the spring months from melting snows coming out of the mountains small tracts of land.

Products:

Stock sales, wool, hides, pelts, pinions, corn and hay are the principal ~~means~~ means of support.

Miscellaneous property:

Five Navajos own automobiles - viz:

Chee Dodge - Dodge car,  
Tom Damon - Ford car;  
Willie Damon Ford car;  
Hosteen Yazza Ford Car;  
Clitsoi Dedman Ford Car.

In addition one of the above parties has a bank account of something like \$80,000 being the largest individual depositor in McKinley County, N. M. at Gallup, N. M., outside of the coal companies.

General outline of the country:

The Navajo reservation is broken by three mountain ranges, viz: Mountain west of Fort Defiance, Ariz., mountain east of Fort Defiance, Ariz., the Black Mountains. There are numerous valleys, canyons, sandy stretches with little if any water; rough broken country with many stretches of solid rock. The valleys have little, if any water. The mountains have lakes on the high tops and outside of the Black Mountain are covered with pine timber. Pinion and Cedar timber covers much of the foot hill country. The country below an altitude of 5,200 seldom has any timber. The rainfall at St. Michaels, Ariz., (altitude of 6,900) ft. has averaged 16 inches for the past twelve years. At Chin Lee, Ariz., elevation 6,000 ft. it averages only about 9 inches yearly. In the lower altitudes it runs less.

No claim is made that this census is absolutely correct. It is as near correct as is possible at this time with no previous census or figures to compare with.

There is a tendency on the part of some of the Navajos, especially those that belong to the smaller and more humble clans, to claim kinship, or attach themselves to the older and more prominent ones. Enumerators are requested to be careful to enumerate all persons under the clan to which they belong by actual blood relationship only

Following is a list of a few names of men and boys. These may be said to be the only real Navajo names outside of the Clan names. The syllable "woot" with which a good many names end, means "to run". Most of the names are preceded with the title "Hoskay". For example the name, "Hoskay Nalwoot" signifies, "The brave who ran home", or the warrior who returned"

1 Analwoot	(A nal woot)
2 Anadsa	(A na dsa)

The following is a list of women and girls. A females name generally comemorates some raid or war expedition of her clansman. The syllable "bah" which has reference to "raids" or war-paries" denotes this.

The syllable should not be detached from the rest of the

name:

1	Ahegibah	(A he gi bah)
2	Aheibah	(A he i bah)
3	Ahenosbah	(A he nos bah)

No attempt was made to list all of the Navajo names in the foregoing. These are only suggestions, which are to indicate the way in which this office wants the names and clans spelled, and enumerators and employees are requested to follow these suggestions as closely as circumstances will permit.

Reservation total acreage - 3,009,960 acres	\$1.50 per acre -	4,514,940.00
3,000,000,000 ft. merchantable timber - stumpage	value of \$2.50 per thousand feet - - - - -	7,500,000.00

Total property - - - - -		<u>\$14,958,748.00</u>

Bank deposits, silverware, etc., includes individual deposits of Navajos in the banks on their own account, etc., also cash that it is absolutely certain they have, not deposited.

Statement relative to land value:

There are 3,009,960 acres in the reservation. During the year 1915 Navajos sold stock ~~and the proceeds~~ wool, hides, pelts, farm products, etc., (all produced from land primarily) to the value of \$990,000, or almost 33% of the land valuation of the acreage - 3,009,906 acres at \$1.50 per acre - \$4,514,940.00. Conservatively figuring money worth 8% the value of land within the reservation on its basis to run stock and produce crops would be worth a little more than \$12,250,000.00 instead of \$4,514,940 as figured.

If we should add the known coal deposits and figure a royalty of 1¢ per ton to the Navajos and base figures entirely on reports of the Geological Survey, the Navajos would be worth \$167,000,000 more, making a total wealth of this portion of the tribe

\* \* \* \* \* \$189,693,808.00 \* \* \* \* \*

The Navajos therefore have \$174,500,000 worth of timber and coal. It is not known that there are other mineral deposits (other than coal) at this time.

There are 990 allotments to Navajos on the Public Domain.
